

RUBBER INSULATING BOOTS

The RUBBER INSULATING BOOTS are used for protection of electrical workers from electrical shock while working on a live electric wire operation.

The RUBBER INSULATING BOOTS are very important personal protective equipments are very important personal electrical working, these are manufactured under very strict quality control.

These are devised so as to put on easily and the reinforced rubber is used partly to strengthen the structure.

INSULATING BOOTS AND HELMETS

PLASTIC INSULATING BOOTS

The PLASTIC INSULATING BOOTS are used for protection of electrical workers from electrical accident while working on a live electric wire operation. These boots are very important personal protective equipments as RUBBER INSULATING GLOVES for safe electrical working, these are manufactured under very strict quality control.

PLASTIC INSULATING HELMETS

The PLASTIC INSULATING HELMETS are used for protection of electrical workers, on their head from electrical shock or from falling materials. These helmets are safety, light, and superior to mechanical powers. These helmets are excellent special quality of electrical insulation, and to though against quality of weather.
